able 2. Differentially expressed transcripts in the corpus callosum of 2VO rats compa

gene description
Rattus norvegicus eukaryotic translation initiation factor 4E member 3
Rattus norvegicus gap junction protein, alpha 5
Rattus norvegicus cysteine-rich secretory protein LCCL domain containing 2
Rattus norvegicus copine IV
Rattus norvegicus tissue factor pathway inhibitor
Rattus norvegicus protein tyrosine phosphatase, receptor type, B
von Willebrand factor Fragment
Rattus norvegicus similar to tensin
Rattus norvegicus potassium inwardly-rectifying channel, subfamily J, member 8
Rattus norvegicus rhomboid, veinlet-like 3
Rattus norvegicus B-cell CLL/lymphoma 6, member B
Rattus norvegicus EGF-like-domain, multiple 7
Rattus norvegicus autophagy-related 10
Rattus norvegicus trafficking protein particle complex 6A
Rattus norvegicus CDC42 effector protein 5
Rattus norvegicus advillin
